Exam : **156-215.81.20**

Title : Check Point Certified
Security Administrator
R81.20

Version : DEMO

1.Which is a suitable command to check whether Drop Templates are activated or not?

- A. fw ctl get int activate_drop_templates
- B. fwaccel stat
- C. fwaccel stats
- D. fw ctl templates -d

Answer: B

Explanation:

The command fwaccel stat shows the status of SecureXL, including whether Drop Templates are enabled or not¹.

4.Using ClusterXL, what statement is true about the Sticky Decision Function?

- A. Can only be changed for Load Sharing implementations
- B. All connections are processed and synchronized by the pivot
- C. Is configured using cpconfig
- D. Is only relevant when using SecureXL

Answer: A

Explanation:

The Sticky Decision Function (SDF) can only be changed for Load Sharing implementations, not for High Availability implementations⁴.

Reference: Check Point ClusterXL R81 Administration Guide

5.What command would show the API server status?

- A. cpm status
- B. api restart
- C. api status
- D. show api status

Answer: D

Explanation:

The command `api status` shows the API server status, including whether it is enabled or not, the port number, and the API version1.
