Exam : 5V0-31.20

**Title : VMware Cloud Foundation
Specialist**

Version : DEMO

1.Which role is required to edit backup configuration in SDDC Manager?

- A. SUPER ADMIN
- B. POWER USER
- C. ADMIN
- D. OPERATOR

Answer: C

2.Which two statements are correct about VMware Cloud Foundation (VCF) license editions" (Choose two)

- A. VCF Enterprise Edition has the capability to use Tanzu Kubemetes services on vSphere.
- B. VCF Starter Edition allows stretching clusters across multiple availability zones.
- C. All VCF license editions include automated deployment and lifecycle management of VCI components
- D. VCF Advanced Edition allows large-scale migrations from old environments to VCF
- E. All VCF license editions have the capability of automated deployment and lifecycle management of user workloads

Answer: A,C

3.An architect designs a VMware Cloud Foundation which includes three workload domains in addition to the management domain Each workload domain is comprised of two Clusters with 19 hosts in each. There is a requirement to keep the NSX-T Manager instances to a minimum for ease of management.

Which NSX-T Manager VM appliance sizing option should the architect choose to support the workload domains using the minimum number of NSX-T Manager clusters?

- A. Deploy one NSX-T Manager cluster using the large VM appliance size to support all three workload domains.
- B. Deploy three NSX-T Manager clusters using the medium VM appliance size and assign one NSX-T Manager cluster per workload domain.
- C. Deploy one NSX-T Manager cluster using the medium VM appliance size to support all three workload domains.
- D. Deploy three NSX-T Manager clusters using the large VM appliance size and assign one NSX-T Manager cluster per workload domain.

Answer: A

4.A system administrator is creating an NSX-T Edge cluster with two-tier routing to the workload domain. The administrator select Workload Management as a use case which requires Large Edge Form Factor. What are the hardware specifications of an NSX Edge Large appliance?

- A. 64 GB memory. 8 vCPU. and 700 GB disk space
- B. 64 GB memory, 16 vCPU. and 250 GB disk space
- C. 32 GB memory, 8 vCPU, and 200 GB disk space
- D. 32 GB memory. 16 vCPU, and 250 GB disk space

Answer: C

5.The VMware Cloud Foundation management domain has been deployed, and post-deployment tasks can now be completed. The administrator needs to configure Single Sign-On for VMware Cloud Foundation user authentication.

Which two authentication sources can be used to accomplish this task? (Choose two)

- A. Novell Directory Services
- B. RADIUS
- C. OpenLDAP
- D. Active Directory
- E. Apache DS

Answer: CD
