Exam : AND-401

**Title : Android Application
Development**

Version : DEMO

1.What method you should override to use Android menu system?

- A. onCreateOptionsMenu()
- B. onCreateMenu()
- C. onMenuCreated()
- D. onCreateContextMenu()

Answer: A

Explanation:

To specify the options menu for an activity, override `onCreateOptionsMenu()` (fragments provide their own `onCreateOptionsMenu()` callback).

References: <http://developer.android.com/guide/topics/ui/menus.html>

2.What Activity method you use to retrieve a reference to an Android view by using the id attribute of a resource XML?

- A. `findViewByIdReference(int id);`
- B. `findViewById(int id)`
- C. `retrieveResourceById(int id)`
- D. `findViewById(String id)`

Answer: B

Explanation:

The `findViewById(int id)` method looks for a child view with the given id.

References: <http://developer.android.com/reference/android/view/View.html>

3.Which of the following is not an Android component (i.e. a point from which the system can enter your application)?

- A. Service
- B. Activity
- C. Layout
- D. Content Provider

Answer: C

Explanation:

Here are the four types of app components: Activities, Services, Content providers, and Broadcast receivers.

References: <http://developer.android.com/guide/components/fundamentals.html>

4.During an Activity life-cycle, what is the first callback method invoked by the system?

- A. `onStop()`
- B. `onStart()`
- C. `onCreate()`
- D. `onRestore()`

Answer: C

Explanation:
