Exam : HP0-S43

**Title : Delta - Architecting HP
Server Solutions**

Version : DEMO

1.A customer needs to take advantage of advanced scripting and troubleshooting on the HP ProLiant DL380 Gen9 servers. They also need to manage their Smart Array controllers and SAS HBAs within the pool of servers. Which feature of your proposed design meets the customer's needs?

- A. HPiLO
- B. HP One View
- C. HP Smart Storage Administrator
- D. HP Array Configuration utility

Answer: B

2.Which innovation in HP DDR4 memory provides an advantage over DDR3 memory?

- A. DDR4 operates at 1.2V.
- B. DDR4 has enhanced ECC algorithms.
- C. DDR4 supports up to three DIMMs per channel (DPC).
- D. DDR4 DIMMs can be overlooked.

Answer: A

3.A security company is upgrading its video surveillance cameras to high definition. This upgrade will increase the storage needs of its backend servers beyond what is supported by the existing hardware. Some data processing will be performed on the video. You need to propose a cost-effective hardware solution that is a highly efficient, converged design that delivers the appropriate combination of capacity and performance, using the least amount of space. Which solution should you demonstrate to the customer?

- A. Moonshot with M300 cartridges with HP StoreVirtual
- B. DL380 Gen9 servers with a 3PAR 7400 storage array
- C. SL4540 Gen8 3x15 model
- D. C7000 BladeSystem with BL460C Gen9 blades and Storage

Answer: C

4.Which statement describes what Datacenter Care services provide?

- A. a mix of enhanced call management, proactive services, and hardware/software assistance
- B. collaborative call management assistance only for x86 solutions
- C. advanced power management monitoring and support
- D. IT professionals with high-quality technical education services

Answer: D

5.A customer needs to manage and maintain the operation of a large hyperscale cluster of SI-based servers. The customer needs to run a set of operating system commands and execute them from within the operating system on all of the SI servers. Which method should the customer use?

- A. Use HP SUM CU online from within the SI operating system and execute the commands by using multicast
- B. Boot HP SUM on one SL node and use iLO federation to execute the commands on all of the servers
- C. Create a script and use the RESTful Interface Tool to execute the commands on all of the servers
- D. Execute the commands from the Cluster Management Utility on all of the servers

Answer: D
