**Exam : HP5-H07D**

**Title : Delta - Sales Essentials of  
HP Workstations**

**Version : DEMO**

1. Why choose one HPC workstation solution over another?

- A. primarily driven by application support
- B. primarily driven by costs
- C. primarily driven by capabilities
- D. primarily driven by skills

**Answer: D**

2. Which employees at media and entertainment businesses are likely candidates for HP workstations?

- A. marketing professionals touching up photos for an office event
- B. office administrators who use office suites
- C. artists who create on large canvases using displays
- D. accountants who maintain business records

**Answer: B**

3. How is the performance of a storage device measured?

- A. total bytes written
- B. mean time between failures
- C. by read/write or seek speed
- D. per megabyte

**Answer: D**

Explanation:

The capability of a storage system to transfer a fixed amount of data in a measured time is known as throughput, or bandwidth. Typically, throughput is measured in megabytes per second (MBps) or similar units.
