Title : Integrating HPE ProLiant
Server Solutions

Version : DEMO

1.An integrator needs to capture hardware and operating system configuration information, and to record critical information for documentation and disaster recovery.

Which tool should an integrator use?

A. Insight Diagnostics

B. Active Health Log

C. Smart Update Manager

D. HPE OneView

Answer: A

Explanation:

Insight Diagnostics Online Edition is aweb-based application that captures hardware and operating system configuration information, records critical information for documentation and disaster recovery, and compares historical configurations on the same server or a baseline server.

2.An integrator needs to install Windows Server 2012 R2 on 6 HPE ProLiant BL460c Gen9 servers. The servers will be part of an SQL cluster and must be configured identically. The integrator needs to use Intelligent Provisioning to complete this task.

What does Intelligent Provisioning use to allow the integrator to create deployment settings profiles to make this process more efficient?

A. HPESSACLI Utility

B. iLO Federation Management

C. HPE Smart Storage Administrator

D. HPE Insight Remote Support

Answer: D

3.A customer with an HPE FlexFabric 650FBL on an HPE BL460c Gen9 is running VMware ESXI 6.0. The integrator needs to upgrade the driver for this adapter to the latest version released by HPE. To avoid a manual download, the integrator plans to use VMware Update Manager (VUM) to download the driver directly.

Where should the integrator point VMware Update Manager?

A. HPE Software Downloads (http://hpe.193.517)

B. HPE Live Network (http://hpln.hpe.com)

C. HPE Driver and Downloads (http://hpe.com/go/support)

D. HPE Software Delivery Repository (http://vibsdepot.hpe.com)

Answer: C

4.An integrator is installing HPE ProLiant DL 380 Gen9 servers for a customer. Earlier, the customer's HPE DL380 G7 server had failed and the maintenance coverage had lapsed without the customer's knowledge.

What should the integrator recommend to the customer to prevent the lack of coverage from occurring on the new Gen9 servers?

A. Buy a post warranty CarePack for each of the servers

B. Configure Insight Online through HPE Support Center

C. Install Insight Control Server Provisioning on each of the servers

D. Manage the servers with HPE OneView

Answer: D

5.An integrator needs to install a new operating system on an HPE ProLiant Gen9 machine.

Which tool should the integrator use to install a single server?

A. Intelligent Provisioning

B. OneView 1.2

C. Service Pack for ProLiant

D. Remote Insight Support

Answer: B

Explanation:HPE OneView for vCenter is a single, integrated application for managing ProLiant servers and HPE storage systems running VMware
