Exam : RCDD-001

**Title : BICSI Registered
Communications
Distribution Designer -
RCDD**

Version : DEMO

1.Which characteristic is an advantage of copper based media over optical fiber cable?

- A. Weight
- B. Corrosion resistance
- C. Ability to handle analog signals
- D. Susceptibility to EMI
- E. Very high data rates

Answer: C

2.Which is an advantage of stranded conductors over solid conductors?

- A. Less costly
- B. Simpler terminations
- C. Better high frequency performance
- D. More flexible

Answer: D

3.Composite conductors, although not generally recommended, may be used in special circumstances because they provide all of the following advantages EXCEPT:

- A. Have good digital transmission characteristics
- B. Lightweight
- C. Inexpensive
- D. Easy to produce
- E. Easily embedded into other materials

Answer: A

4.Which electrical characteristic is displayed with the correct preferred value?

- A. Dielectric constant – high value
- B. Dielectric strength – high value
- C. Dissipation factor – low value
- D. Insulation resistance - high value

Answer: A

5.If the input signal power to a communication system is 1 W and the output power is 1 mW, the system attenuation is:

- A. 3 dB
- B. 20 dB
- C. 30 dB
- D. 40 dB
- E. 1000 dB

Answer: C
